

Powerful, intuitive software  
that will transform your  
apprenticeship delivery

# Introducing Bud's next generation software

We wanted to simplify the delivery of apprenticeships and bring the many processes together within a single, intuitive software platform. Across two decades in the training and development industry, we've witnessed first-hand the challenges that can affect apprenticeship management. We knew there had to be a better way. **That's when Bud was born.**

Bud combines our industry expertise and experience to provide a straightforward, fully integrated software solution that effortlessly overcomes the many issues faced by training providers.

Bud is designed to be a true end-to-end solution for the management and delivery of apprenticeship programmes and to help our customers focus upon the delivery of exceptional training.

Bud is designed to transform the way you manage and deliver apprenticeships

# A single integrated system

## Programme Design

Enables you to create and deliver professional, consistent and scalable programmes, and capture off-the-job training requirements.

## Enrolment

Fast, simple and compliant eligibility and enrolment process, including initial skills and LRS integration. Track the progress of your candidate pipeline with ease.

## Evidence Pack

Dynamically generate your electronic paperwork and store, access and manage your funding claim evidence within a single system.

## Learning Delivery

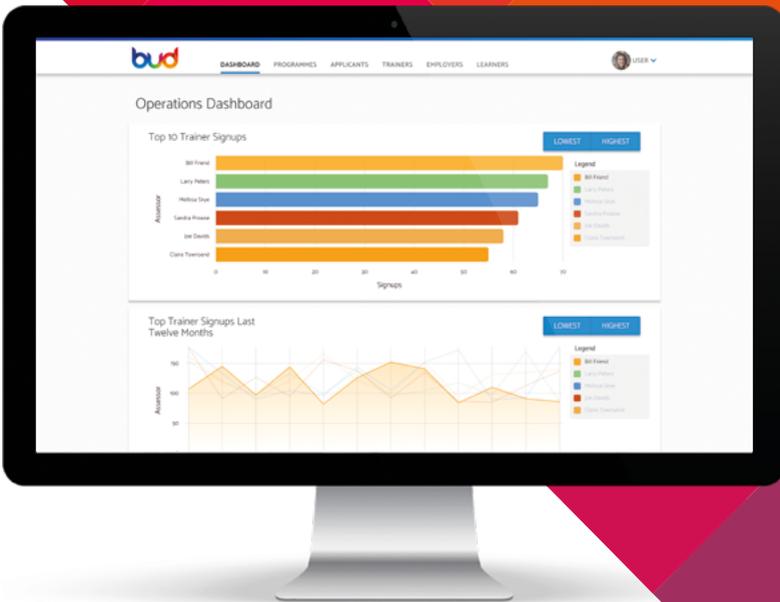

Intuitive, engaging platform, incorporating e-portfolio functionality. Allows learners and trainers to interact and guides apprentices through their learning journey to EPA.

## Funding Management

ILR generation, dashboards and reporting help to keep all stakeholders informed, drive operational efficiencies and ensure quality and compliance.

Bud's software platform is designed to help businesses grow whilst maintaining full control

## Deliver perfect programmes

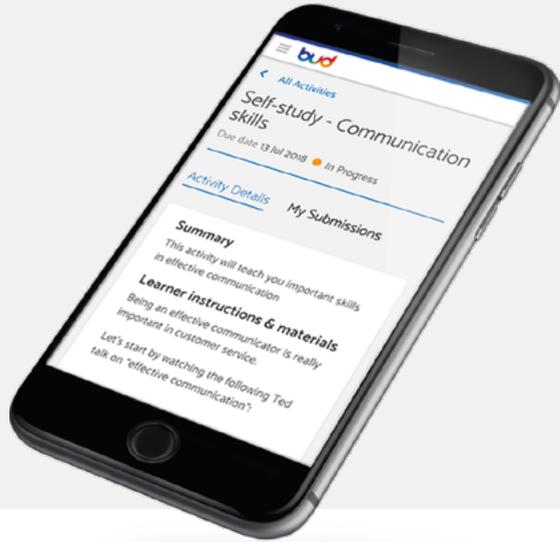

Whether you build your own or use the templates provided, our Programme Design suite helps you create consistently outstanding programmes to deliver again and again.

## High performance

Built to the highest specification on MS Azure cloud technology, Bud delivers speed, security and reliability across the board.

## Engage with learners

Bud's Learning Portal builds on the programme template to create a true learning support system with integrated e-portfolio. It guides learners through their apprenticeship with motivational features, learning plans, inclusive interactions and time-saving self-service activities.

## A complete platform

Bud seamlessly combines application management, programme creation, learning delivery, workforce and learner reporting, funding management and more.

## Simple and powerful

An intelligent system that directs and encourages efficiency and compliance. Designed with the apprenticeship reforms and Ofsted in mind, Bud will meet the growing needs of your business.

---

Bud is designed to engage the learner and the employer

# Join the growing number of organisations transforming their apprenticeship delivery with Bud

It is the ease of use that is so impressive, our learners find it intuitive and it ticks all the boxes for delivering the new standards.

Head of Operations

Bud has made a huge difference to our enrolment process, saving us administration time and speeding up our ability to progress candidates through to sign-up.
